

GUARDTOP® ULTRA

Designed for increased flexibility and durability, GuardTop Ultra is a high-performance mineral and fiber reinforced asphalt sealcoat formulated with specially designed polymers for improved adhesion, performance and longevity. GuardTop Ultra restores the asphalt binder lost through oxidation and weathering, while providing a durable surface treatment. It provides the surface with a deep, rich black color and protects against raveling and cracking due to aggregate loss, thus making the pavement look new again. Per the GuardTop standard, GuardTop Ultra is environmentally friendly, qualifies for LEED points and is free of harmful PAHs.
